

Evaluation Note: Retrieval Quality

We compared three retrieval configurations on an internal benchmark of 500 queries. Scores are NDCG at 5, higher is better.

Configuration	NDCG@5	Latency p95
Baseline BM25	0.41	40 ms
Dense only	0.58	90 ms
Hybrid rerank	0.67	140 ms

The hybrid configuration won on quality at an acceptable latency cost and is recommended for the next release.
